- Peace Corps, Eastern Europe
- Teach and Learn in Korea
- Teach for America, New Orleans, Louisiana

**Sarah McGough '14**  
Anthropology major  
Master's student, infectious disease epidemiology, Harvard School of Public Health

"I chose Anthropology because I wanted something that wouldn't just teach me a singular skill set. I wanted to learn how to think and to challenge my beliefs and to learn about the world, then learn how to engage that world when I left college. I wanted my four years to be a very dynamic experience where I could take classes that fascinated me and then figure out how to use all of that.

"And that's what Anthropology does—it's a perspective, a tool, a lens through which you can view the world. Anthropology synthesizes all fields—history, religion, medicine, biology, archaeology—to answer the one singular question, which is that of the human existence and the human experience."

36% go to graduate or professional school

- Anthropology:** Emory University, University College London, University of Colorado, University of Wisconsin
- Archaeology:** Arizona State University, University of Massachusetts
- Environmental science:** University College Dublin
- Evolutionary biology:** Harvard University
- Global health:** Duke University
