of recent Notre Dame Gender Studies majors started full-time jobs, enrolled in graduate school, entered service programs, or launched independent projects within six months of graduation.

Michelle McCarthy ’16
Gender Studies major
Research and writing assistant, J Strategies Inc.

“Gender is something that affects our entire lives — from the classroom to the workplace to your personal life. As a Gender Studies major, you read books and articles from a wide range of scholars who have an array of opinions on gender. You learn to interrogate and critique each work and think critically about what you believe.

“The Gender Studies program taught me how to analyze, write, and speak about complex topics. These are skills that are essential to my work at J Strategies, a communications and government relations firm, and will help any Gender Studies major in the modern workplace.

“One of the most beneficial parts of the program is that the major is incredibly interdisciplinary. I was able to take classes cross-listed with everything from history to English to sociology. I learned how to communicate effectively across a variety of disciplines and take advantage of all that Arts and Letters has to offer.”
