Law: Columbia University, University of Chicago, Villanova University

Political science: University of California-Davis

Elisabeth O'Toole '17
International Economics major
Senior research associate,
Jameel Poverty Action Lab | MIT

"My favorite subjects were always math and Spanish, but I wasn't sure how either would be applicable in generating social impact. I was thrilled to find that the International Economics degree would allow me to combine and apply both skills toward making the world a better place.

"Since graduation, I have worked in two economics research labs specializing in impact evaluations of social service programs. My degree has directly supported my daily functions through coursework in econometric theory and research design. The international lens, in particular, allows me to collaborate in Spanish with our regional office in Latin America and to consider a broad perspective while assessing study implications.

"International Economics taught me to think critically, to extract lessons from data, and to communicate results with those directly impacted. It fostered my independence and curiosity through opportunities to study and research abroad. That spirit of adventure and wonder will remain with me as I continue to discern and advance my career."

8% entered service programs

Alliance for Catholic Education,
Dallas, Texas
 Cristo Rey New York High School,
New York
 Good Shepherd Volunteers,
Los Angeles, California
 Nuestros Pequeños Hermanos,
