Earn two degrees in five years: a B.S. in any Engineering major and a B.A. in any Arts and Letters major. The dual degree program makes it possible, and the possibilities are endless ...

It is vital that those intimately engaged in the creation and implementation of technology reflect broadly on the world their work will transform.

Invest in yourself—choose an unsurpassed undergraduate education for every aspect of your life.

“I speak the language of all my customers—I understand the engineers, the accountants, the economists—and having the broader education background helped.”
— 1978 graduate

“I was in the technical side of engineering for a while and then on the management side. The program was key to success in management. It was more than just the communicating and writing—it was having the understanding of issues and how people looked at things.”
— 1966 graduate
